PROFILE

Computer Science and Engineering undergraduate at the University of Moratuwa with hands-on experience in machine learning, data engineering, software development, and robotics. Contributed to research and collaborative projects involving graph-based forecasting, medical-image analysis, time-series forecasting, and desktop and web applications. Seeking an internship to apply strong programming, analytical, and problem-solving skills to real-world software and artificial intelligence systems.

EDUCATION

BSc Engineering Honours in Computer Science & Engineering <i>University of Moratuwa</i> Cumulative GPA: 3.39	2024–Present <i>Moratuwa, Sri Lanka</i>
G.C.E. Advanced Level – Physical Science Stream <i>Bandaranayake College</i> 3 A Passes; Z-Score: 2.202	2022 <i>Gampaha, Sri Lanka</i>

PROJECTS

Dynamic Pricing and Inventory Forecasting Engine <i>Python, Time-Series Forecasting</i> - Developing a forecasting workflow to analyse inventory demand and support data-driven pricing decisions. - Organising the project as a reproducible workflow for future model evaluation and improvement.	Ongoing
Smart Grid Load Forecasting System <i>Python, Time-Series Forecasting, Predictive Modelling</i> - Developing a predictive workflow for forecasting hourly national-grid power load from historical observations. - Preparing data-processing and forecasting components for reproducible model experimentation.	Ongoing
Automated Glaucoma Detection <i>Python, Deep Learning, Image Segmentation, Machine Learning</i> - Developed an automated glaucoma-screening pipeline using fundus images and optic disc-cup segmentation. - Combined deep-learning segmentation with machine-learning classification to support robust glaucoma screening.	2026
TalkLess Audio Management Application <i>QML, Desktop Development, Audio Management</i> - Collaborated on the development of a QML-based desktop audio management application for a real-world client based on client-specific requirements. - Contributed to designing, implementing, and refining a structured, user-friendly interface and workflow based on client feedback.	2026

RESEARCH AND PUBLICATIONS

AEGIS-Dengue – Spatiotemporal Dengue Forecasting System <i>Ongoing Research Project</i> - Developing a spatiotemporal graph neural network to forecast district-level dengue cases one to four weeks ahead across Sri Lanka. - Integrated ERA5-Land climate data through Google Earth Engine and aggregated district-level weather variables into weekly features. - Built leakage-controlled sequence tensors, expanding-window validation splits, and geographic adjacency matrices for Sri Lanka's 25 districts.	Ongoing
Sri Lanka Holiday Dataset <i>Published Dataset</i> - Created and validated a structured Sri Lankan public-holiday dataset for analytical, forecasting, and machine-learning applications. - Implemented validation procedures to identify invalid dates, duplicates, missing values, and inconsistent holiday records. - Published the dataset on Zenodo with the persistent DOI: 10.5281/zenodo.21787518.	2026

Forecasting Weather-Driven Price Dynamics Across Sri Lankan Tea Market Catalogues | *Research2026 Project*

- Research paper accepted for presentation at MERCon 2026.
- Developed a reproducible data pipeline to extract, clean, and transform semi-structured Sri Lankan tea-auction reports into analysis-ready datasets.
- Integrated auction prices, production statistics, market-segment information, and weather variables for exploratory analysis and predictive modelling.
- Prepared validated datasets and analytical workflows to investigate weather-driven price dynamics across Sri Lankan tea market catalogues.

COMMUNITY INVOLVEMENT

PyTorchSL Hands-on

Community Learning Initiative, PyTorchSL Community

Present

Sri Lanka

- Support beginner-friendly, structured PyTorch learning through guided lessons and practical examples.
- Help students and newcomers build foundational PyTorch knowledge through hands-on learning activities.

ACHIEVEMENTS & ACTIVITIES

- **Finalist – Sri Lanka Robotics Challenge**, University of Moratuwa – 2026.
- **Finalist – Sri Lanka Robotics Challenge**, University of Moratuwa – 2025.
- **Finalist – UoJ Coders V4.0**, University of Jaffna – 2025.
- **Top 10 Finalist – Micro Maze 2.0 Competition**, Informatics Institute of Technology – 2025.
- **Top 30 – Data Storm 7.0** , University of Moratuwa – 2026.

SKILLS

Technical Skills

Programming: Python, C, C++, C#, Ballerina

Framework: React, QML, open-cv

Databases: MySQL, SQL

ML & Data: PyTorch, TensorFlow, Deep Learning, Pandas, skit-learn,

Developer Tools: Git, GitHub, Visual Studio

Non Technical Skills

Collaboration: Teamwork, Team Coordination, Time Management

Problem Solving: Analytical Thinking, Critical Thinking

Work Skills: Adaptability, Continuous Learning, Leadership

VOLUNTEERING EXPERIENCE

- **Junior Teasure** - Mora Lenz, Mass Media Club of University of Moratuwa | 25/26 Term
- **Web Team Lead** - Mora Lenz, Mass Media Club of University of Moratuwa | 25/26 Term
- **Junior Web Editor** - IESL Student Chapter University of Moratuwa | 26/27 Term
- **Committee Lead** - IESL RoboGames 25/26, University of Moratuwa
- **Committee Member** - Hit the Ground 2026, University of Moratuwa
- **Company Coordinator** - CSE Careers Day 2026, University of Moratuwa
